Subject: Proposal on Event Based Surveillance (EBS) – One Health Project, by Pak One Health Alliance (POHA) Islamabad – Letter of Support.

Dear Sir,

With reference to above mentioned concept note/brief of the above titled project “**Proposal on Event Based Surveillance (EBS) – One Health Project, by Pak One Health Alliance (POHA) Islamabad – Letter of Support**” received through University of Health Sciences, Lahore, which happens to be one of implementing partners for the proposed project. I have gone through the project concepts note, the scope, methodology and timeline found this quite innovative doable project. My Department/Laboratory would be keen to actively participate in creating a model One Health Project. All possible coordination in this context would be extended to Pak One Health Alliance, University of Health Sciences Lahore, Punjab Secondary and Primary Health Care Department (P&SHD) for the successful implementation of the Project. It will be my pleasure to help you. Thanking you in anticipation.

Dr. Muhammad Kashif Saleemi
